

Risk ID	Category / Element	Risk Short Title	Description	Desired Outcome	Current Situation	Proposed Strategy
C00218 □	M2 Project Organisation	Emphasizing character development in early adopters	Character development refers to nurturing foundational human qualities like empathy, resilience, honesty, curiosity, and responsibility in children. In the context of the Arini Method, this isn't just a byproduct of learning, it's the core objective. Early adopters (the first pilot communities and classrooms) will set the tone for how the method is received, understood, and replicated. Therefore, it's critical that these first locations prioritise character development over rote academics, exam preparation, or status-seeking outcomes.	Strong character values instilled early through language and learning environments What Could Go Wrong? Character development may be overlooked in favor of rigid academic metrics	Pilot sites are interested in child development but may lack structured support for values education	Incorporate explicit character-building modules into teacher training and parent sessions
