PR001 Nigeria Youth Support	CY001 <a href="#">Nigeria</a>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p><a href="#">Make Scalped Lists</a></p> <p><a href="#">Make Scalped Maps</a></p> <p><a href="#">Make PHC Database [Links]</a></p>
<p>PR002 Thorium Reactor</p> <p>This project proposes the deployment of Thorium Reactor power stations across Nigeria, beginning with a pilot plant in Akwa Ibom State and expanding to one or two reactors in each of the 36 states. Thorium is favored for its safety, abundance, and efficiency over traditional uranium. The initiative aims to address Nigeria's persistent energy deficit, drive economic growth, reduce carbon emissions, and position the country as a leader in nuclear innovation in Africa. Spanning 30 years with an estimated cost of \$143.5 billion, the project includes feasibility studies, construction, national rollout, and optimization phases, delivering reliable, clean energy and nationwide development benefits.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]	Start Date	<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p><a href="#">Make PHC Database [Links]</a></p>
<p>PR003 National Licence Monitoring</p> <p>This project aims to establish a National Mining License Monitoring System to improve oversight of Nigeria's mining sector. It will create a centralized digital platform to track exploration and mining license holders in real time, ensuring regulatory compliance, transparency, and increased government revenue. The project will be rolled out in four phases: system design and development, pilot testing, nationwide deployment with training, and ongoing monitoring. With a total cost estimate of \$5–7 million (excluding ongoing operations), the system will enable better data collection, environmental protection, and informed decision-making, ultimately supporting sustainable growth and accountability in Nigeria's mining industry.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]	Start Date	<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p><a href="#">Make PHC Database [Links]</a></p>
<p>PR004 Power Integration</p> <p>This project aims to transform Nigeria's power sector by integrating existing energy sources—hydroelectric, gas, and renewables—into a unified system of modular refineries and decentralized mini-grids. Designed to boost national grid reliability and support cross-border electricity exports, the initiative will modernize grid infrastructure and expand energy access to underserved rural and industrial areas. With an estimated cost of \$10–15 billion and a rollout period of 8–12 years, the project promises enhanced energy security, reduced transmission losses, economic growth, and environmental sustainability. By exporting surplus power, Nigeria can also strengthen its position as a regional energy leader in West Africa.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]	Start Date	<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p>

<p>PR021 ExxonMobil OWO</p> <p>ExxonMobil is planning a \$10 billion investment in Nigeria's offshore oil sector, focusing on the development of the Owo project—a significant deep-water initiative aimed at boosting the country's oil production. This project is expected to increase Nigeria's oil output by 50,000 barrels per day over the next few years. Additionally, ExxonMobil intends to invest approximately \$2.5 billion annually in maintenance and production enhancement activities. The company is collaborating with the Nigerian government to secure favorable fiscal terms to facilitate this substantial investment, aligning with efforts to revitalize Nigeria's oil industry and stimulate economic growth.</p>	CY001 <span>Nigeria</span>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Lists Make Scalped Maps Make PHC Database [Links]</p>
<p>PR022 Kaduna Abuja Highway</p> <p>The Kaduna-Abuja Highway is a key 200-kilometer transport route linking Nigeria's capital to Kaduna, essential for trade, mobility, and regional integration. Initially awarded to Julius Berger Nigeria Plc in 2017, the road's reconstruction faced delays due to funding issues, expanded scope, and security concerns. The contract, originally budgeted at ₦155.7 billion, ballooned to ₦1.5 trillion before being terminated in November 2024 due to non-compliance. The government is now pursuing new contractors and improved oversight mechanisms. Once completed, the project is expected to enhance road safety, stimulate economic activity, and generate employment, reinforcing Nigeria's commitment to efficient infrastructure development.</p>	CY001 <span>Nigeria</span>	[PHC Project]	Needs proposing - Juan contacts warming.	<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Maps Make PHC Database [Links]</p>
<p>PR023 ALSCON Gas Project</p> <p>The Aluminium Smelter Company of Nigeria (ALSCON), located in Ikot Abasi, Akwa Ibom State, is set for revitalization following a \$1.2 billion agreement signed in November 2024 between BFI Group, ALSCON's core investor, and the China National Chemical Engineering Corporation (CNCEC). This initiative aims to rehabilitate ALSCON's 135 million standard cubic feet per day (MMscfd) gas processing plant, which is integral to resuming aluminium production. Once operational, ALSCON is projected to produce up to one million metric tonnes of aluminium annually and generate approximately 540 megawatts of electricity, significantly contributing to Nigeria's industrial and energy sectors.</p>	CY001 <span>Nigeria</span>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Lists Make Scalped Maps Make PHC Database [Links]</p>

Project Summary	Country	Status	Start Date	Updated
<p>PR024 Lakel Mining Operation</p> <p>Lakel Group, a multinational conglomerate operating in the UK, USA, and Nigeria, is preparing a large-scale mining project in Nigeria, primarily targeting lithium to meet global battery demand. The initiative also includes the extraction of manganese, bauxite, and gold, with operations led by six specialized subsidiaries. Initial activities will focus on lithium-rich areas such as Nasarawa, Oyo, and Kwara States. Infrastructure development and environmental planning are underway, though challenges like funding delays, regulatory complexities, and community concerns remain. The project aims to boost Nigeria's economy through job creation, foreign investment, and technology transfer while supporting the global transition to clean energy.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Lists Make Scalped Maps Make PHC Database <a href="#">[Links]</a></p>
<p>PR025 Calabar Abuja Highway</p> <p>A flagship infrastructure project under Nigeria's Renewed Hope Legacy Projects, aimed at improving connectivity between Calabar in the south and Abuja in the north. Traversing Cross River, Ebonyi, Benue, Kogi, and Nasarawa states, the highway is designed to support trade, agriculture, and regional integration. In November 2024, the Federal Government signed a contract with InfoWest International Limited to begin work on Section 1—a 118.85 km stretch using reinforced concrete. The project is expected to reduce travel time, boost economic activity, and serve as a vital corridor linking southern Nigeria to the capital and central regions.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]	Needs proposing - Juan contacts warming.	<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Maps Make PHC Database <a href="#">[Links]</a></p>
<p>PR026 Akwa Ibom Power Plant</p> <p>The Ibom Power Plant, located in Ikot Abasi, Akwa Ibom State, is one of Nigeria's pioneering independent power projects. Established in 2001 by the Akwa Ibom Investment Corporation, the plant began operations in 2009 with an installed capacity of 191 megawatts (MW), utilizing natural gas supplied from the Uquo Gas Processing Facility. In 2015, its generation license was amended to increase capacity to 685 MW, accommodating both the existing plant and a proposed expansion. The plant plays a crucial role in enhancing electricity supply within Akwa Ibom and contributes to Nigeria's national grid. Recent developments include government initiatives to further improve power generation and distribution, underscoring the state's commitment to energy infrastructure development.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Lists Make Scalped Maps Make PHC Database <a href="#">[Links]</a></p>
<p>PR027 Akwa Ibom Deep Sea Port</p> <p>The Ibom Deep Seaport (IDSP) is a proposed \$4.2 billion greenfield port project in Akwa Ibom State, Nigeria, designed to alleviate congestion at existing ports and serve as a transshipment hub for the West and Central African region. Spanning 2,565 hectares, the port will handle container, breakbulk, dry bulk, and liquid cargo, accommodating vessels with drafts up to 15 meters. Integrated with the 14,517-hectare Ibom Industrial City, the project aims to boost economic development and create approximately 300,000 jobs. Despite initial setbacks, including investor withdrawals, the Akwa Ibom State Government is actively seeking collaboration with the federal government and private investors to realize the port's potential.</p>	CY001 <a href="#">Nigeria</a>	[PHC Project]		<p>29/03/2025</p> <p><b>Assigned</b></p> <p>David 27/03/2025</p> <p>Make Scalped Lists Make Scalped Maps Make PHC Database <a href="#">[Links]</a></p>

It spans approximately 1,028 kilometers and connects major cities across five countries: Côte d'Ivoire, Ghana, Togo, Benin, and Nigeria. The project is part of the larger Dakar-Lagos Trans-West African Coastal Corridor and aims to improve trade, transport, and logistics across the region. It will include a six-lane dual carriageway to facilitate smoother and more efficient movement of goods and people.</p>	CY001 <span>Nigeria</span>	Live	01 Jan 2024	<p>Updated</p> <p>02/08/2024</p> <p><b>Assigned</b></p> <p>David 21/07/2024</p>
<p>PR286 Badagry Deep Sea Port Project</p> <p>The Badagry Deep Sea Port is an ambitious infrastructure project in Nigeria aimed at establishing one of Africa's largest and most technologically advanced ports. Located in the Badagry area of Lagos, the project will encompass a container terminal, break bulk terminal, offshore supply base terminal, and various other facilities spread over approximately 496 hectares. The port is expected to enhance Nigeria's maritime capacity, reduce congestion in existing ports, and boost the country's economic growth by improving trade logistics and creating significant employment opportunities.</p>	CY001 <span>Nigeria</span>	Live	01 Sep 2024	<p>Updated</p> <p>02/08/2024</p> <p><b>Assigned</b></p> <p>David 21/07/2024</p>
