Project Summary	Country	Status			
PR282 Sanbrado Gold Project	CY126 Burkina Faso	Finished	Start Date	01 Jul 2018	Updated
A high-grade gold mining operation located approximately 90 km east-southeast of Ouagadougou, the capital of Burkina Faso. Developed by West African Resources (WAF), which holds a 90% stake (with the remaining 10% held by the Government of Burkina Faso), the project encompasses both open-pit and underground mining methods. The mine commenced construction in July 2018 and achieved its first gold pour in March 2020, ahead of schedule and under budget. The processing plant has a throughput capacity of 2.2 million tonnes per annum (Mtpa) and utilizes conventional carbon-in-leach (CIL) technology.		As of early 2025, Sanbrado is in full production. In 2024, the mine produced 206,622 ounces of gold, aligning with the upper end of the company's guidance. The current mine plan extends until 2034, with average annual production expected to be over 210,000 ounces. Production is anticipated to increase to over 230,000 ounces per annum from 2026, with the introduction of the Toega open pit and M5 South underground operations.			29/04/2025

PR283 Pandemic Fund Project	CY126 Burkina Faso	Near	Start Date	01 Jan 2020	Updated
Aims to bolster the country's capacity to manage public health emergencies through a comprehensive One Health approach. This strategy integrates human, animal, and environmental health sectors to enhance disease surveillance, laboratory infrastructure, and workforce skills. The initiative is a collaborative effort involving the Ministry of Health, FAO, WHO, and UNICEF, with the overarching goal of aligning Burkina Faso's health systems with the International Health Regulations (IHR) 2005 standards by 2026.		As of April 2025, the project is actively being implemented across all 13 regions of Burkina Faso. Launched in June 2024, the project focuses on enhancing disease surveillance systems, laboratory capacities, and public health emergency preparedness. This initiative is particularly crucial given the closure of over 200 health facilities and the increasing number of internally displaced persons in the country.			29/04/2025

PR284 Land and Mining Management Strengthening Project	CY126 Burkina Faso	Live	Start Date	01 Jan 2022	Updated
The Land and Mining Management Strengthening Project in Burkina Faso is a collaborative initiative between the World Bank and the Government of Burkina Faso, aimed at enhancing the governance and management of land and mining resources. The project focuses on improving the legal and institutional frameworks, increasing transparency in the allocation and management of land and mining rights, and strengthening the capacity of relevant institutions. Key components include the development of a modern land information system, the formalization of customary land rights, and the implementation of environmental and social safeguards in mining operations.		As of April 2025, the project is in the implementation phase. Significant progress has been made in establishing the land information system and in drafting legislation to formalize land tenure. Capacity-building programs for local authorities and stakeholders are ongoing, and efforts to improve transparency in the mining sector are being actively pursued.			29/04/2025
