

Calabar-Abuja Highway - PHC Service

Events – [SCALPED]

Project Kick-off Meeting

- Initial meeting involving all key stakeholders to align on project scope, objectives, timelines, and responsibilities.

Groundbreaking Ceremony

- Formal event marking the commencement of construction activities, attended by government officials and community leaders.

Security Assessment and Implementation Briefing

- A coordinated event to assess security needs and discuss safety protocols with relevant authorities and security personnel.

Stakeholder Engagement Sessions

- Meetings with community representatives, local government officials, and public interest groups to ensure transparency and gather feedback.

Environmental Impact Review Meetings

- Review sessions with environmental consultants and regulatory bodies to discuss findings and establish necessary environmental protections.

Phase Completion Milestones

- Periodic events marking the completion of significant construction phases (e.g., completion of earthworks, paving, or bridge construction).

Progress Review Meetings

- Monthly and quarterly meetings involving project managers, contractors, and key stakeholders to evaluate progress and address any challenges.

Regulatory Compliance Inspections

- Scheduled site inspections by government and environmental authorities to ensure adherence to construction regulations and standards.

Community Outreach and Update Workshops

- Interactive sessions to keep local communities informed about project developments and anticipated impacts.

Media Updates and Press Conferences

- Regularly scheduled press briefings to update the public on progress, highlight achievements, and communicate any changes in project plans.

Risk Management and Contingency Planning Sessions

- Events focusing on the identification of new risks and the revision of contingency strategies to mitigate potential project disruptions.

Training and Capacity Building Workshops

- Training events for project staff to ensure they are equipped with the necessary skills and knowledge to manage and execute the project effectively.

Quality Assurance Inspections

- Routine inspections to review the quality of materials and workmanship, ensuring compliance with engineering standards.

Supplier and Logistics Coordination Meetings

- Meetings to manage supply chain issues, discuss delivery schedules, and address any logistical challenges.

Testing and Commissioning of Sections

- Events focused on testing completed sections of the highway for safety, functionality, and compliance before opening them to traffic.

Final Project Review and Inspection

- Comprehensive inspection and review of the completed project, involving all relevant stakeholders to ensure all aspects meet set standards.

Project Handover Ceremony

- Official event to mark the completion and transfer of the highway to the responsible authorities for public use and future maintenance.

Post-Completion Community Feedback Event

- Organized session to gather feedback from local communities regarding the completed project and any remaining concerns.

Maintenance Planning and Strategy Workshops

- Events focused on developing a detailed maintenance strategy to sustain the road's quality over time.
