Garden Fleet (GF): Regenerative Coastal Restoration & ESG Impact

Empowering Angel Investors & Family Offices to Drive Measurable Environmental and Social Returns

www.garden-fleet.com

The Global Challenge

Our oceans and coastlines face severe threats from mismanaged waste and erosion:

400M+

Tonnes

Plastic waste produces annually worldwide

80%

Ocean Plastic

Originates from coastlines

~24%

of the world's sandy beaches are eroding

100s

Communities Threatened by island erosion

In the Philippines...

2.7 M

Metric Tons of plastic is entering Philippine

waters annually

Global Ranking

Philippines is considered the third country for ocean plastic waste globally according to the World Bank

<10%

of all global plastic has ever been recycled

The challenge of coastal erosion

The Philippines faces significant coastal erosion, particularly in its island communities, with measurable impacts on human settlements and biodiversity loss...

the Philippine Sea are rising at a rate of 5 to 7 mm/year, faster than the global average, contributing to increased erosion risks

Beach erosion endangers 24% of sandy beaches, imperiling habitats for marine species like turtles and birds.

The Garden Fleet Solution

Ocean Cleanup

Operational ocean cleanup using low-cost fleets of ships to gather plastic waste from coastlines

Tree Planting & Reforestation Planting mangrove trees along vulnerable coastal areas to help prevent beach erosion

Sustainable Funding Model Regenerative Finance (ReFi) token model to sustain continuous operations and track impact

Garden Fleet Operational Model

Low-Cost Fleet Operations

Å

22

Deploy specialized vessels to remove plastic waste directly from beaches and waterways.

Local Workforce & Community Engagement

Empower local teams, providing meaningful jobs and fostering environmental stewardship.

Recycling & Upcycling

Sort and transform collected plastic waste into usable building materials in partnership with CubeSpawn, reducing landfill dependency.

Mangrove Reforestation

鍛資

Natural Barrier Creation

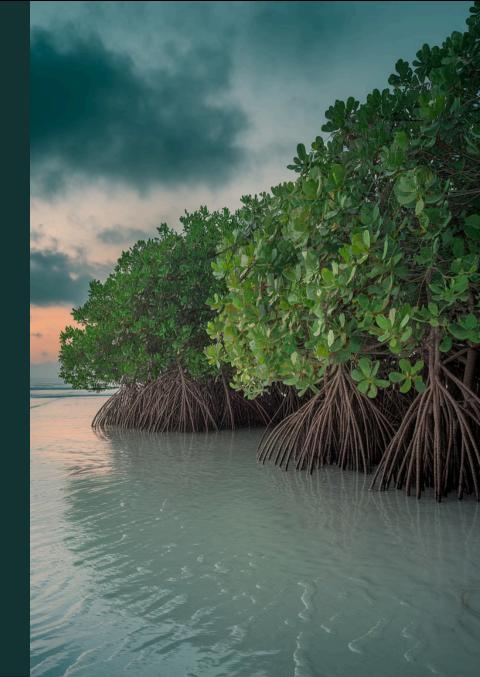

Plant mangroves to stabilize shorelines and protect coastal communities from beach erosion

7 Ecosystem Restoration

Enhance biodiversity by creating habitats for marine and coastal species

Carbon Sequestration

Each tree planted helps offset carbon footprints, boosting ESG metrics for investors and corporate partners

Mangroves sequester an estimated 22.8 to 25.5 million metric tons of carbon annually, playing a crucial role in global carbon management

Blockchain Tracking & ESG Verification

Absolute Transparency

Our transparent system validates environmental impact through blockchain technology On-Chain Proof of Impact

Every ton of plastic removed and every mangrove planted is logged on a transparent, tamperproof ledger (CELO blockchain)

NFT Certificates

Ocean Guardian (for plastic removal) and Mangrove Guardian (for reforestation), providing verifiable ESG claims for stakeholders

Why do we provide ESG boosting services ?

ESG is a Driver of Sustainable Returns

Regulatory Compliance

Many companies face new regulations and investor pressures to show tangible environmental impact.

Direct Impact Services

Garden Fleet sells direct cleanup and reforestation services providing measurable environmental benefits.

Verifiable ESG Benefits

Our solutions help clients fulfill compliance requirements and enhance brand reputation with *verifiable* impact.

Stable Revenue Stream Through Service Contracts

ESG as a Service

The fleet secures *recurring contracts* with corporate, government, and hospitality clients through annual plastic-removal quotas and reforestation targets.

Sustainable Cash Flow

These paid partnerships drive sustainable cash flow, supporting continued expansion and higher returns for investors.

Our transparent approach builds confidence across your stakeholder ecosystem

Blockchain Transparency

Transparent, blockchain-tracked impact fosters trust among consumers, shareholders, and regulators.

Demonstrable Impact

Companies that engage *Garden Fleet* can publicly demonstrate *real & measurable* contributions

Recycling & Upcycling

Only around 9% of the world's plastic waste is actually recycled—leaving the remaining 91% to accumulate in landfills or leak into the environment

CubeSpawn Modular Recycling

Thermal treatment

Using pyrolytic chambers to break <u>down m</u>aterial safely

Gasification

Converting waste into syngas without toxic emissions

This closed-loop system ensures maximum recovery of resources while minimizing environmental impact.

From Ocean Waste to Community Infrastructure

Materials that are not permanently incinerated are converted into **durable**, **low-cost building blocks**, made available **at-cost** to support sustainable infrastructure for vulnerable coastal communities.

This closed-loop system transforms ocean waste into community resilience

The Strategic Partners Powering Garden Fleet

Through The Golden Door (TTGD)

Community Development & Regenerative Living

Education & Housing

Providing essential services including housing, education, and mental health support for local residents and clean-up staff

ESG Tourism

Hosting ESG investors and ecotourists on-site to experience sustainable development firsthand

Community Engagement

Driving local participation to build long-term resilience and selfsufficiency

CubeSpawn

Recycling, Upcycling & Circular Economy

Processing Recovered Plastics

Processes recovered plastics into construction materials for sustainable building solutions

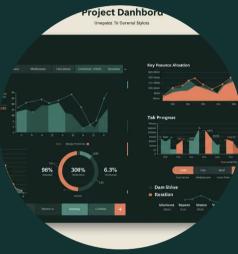

Modular Recycling Systems

Implements modular, low-emission recycling systems that minimize environmental impact

Order Efficiency (OE)

Project Management & ESG Oversight

Real-time Analytics

Deploys Project Health Control (PHC) for comprehensive real-time analytics and monitoring

ESG Alignment

Ensures ESG alignment, risk management, and complete reporting compliance

Workforce Development

Sponsors comprehensive workforce development & specialized training initiatives

Strategic Expansion

Supports expansion through cultivating new partnerships and grants

Abu-Bakr Harakat

Founder and leader of Garden Fleet, with over a decade of experience in military operations, U.S political campaigns, and information systems. A seasoned project management specialist, driven by the purpose of reducing global pollution. Leverages AI-driven tools and the PHC methodology to deliver scalable, blockchainverified ESG impact through coastal restoration and regenerative finance.

David Winter

An engineering veteran with 30+ years of global experience in Oil & Gas, Rail, and Infrastructure. He brings expertise in project risk analysis and assurance to ensure Garden Fleet's ESG operations are safe, efficient, and accountable. Utilizing the PHC (Project Health Control) system, he provides stakeholders with clear monetary oversight and performance tracking.

Not Just Palawan – A Global Coastal Restoration Vision

Not Just Palawan – A Global Coastal Restoration Vision

We're launching in **Palawan**, **Philippines**—a strategic entry point in a country ranked among the **world's top contributors to ocean plastic**.

Starting in Palawan

Beginning our operations in the strategic coast of Narra

Modular Fleet Model

A low cost sustainable, replicable and scalable model

Global Scalability

Expandable to nations with high coastal plastic pollution, creating worldwide impact in at-risk regions

Your investment helps us launch the first fleet and build a model ready to restore coastlines worldwide.

Join Us – Be Part of the Solution

Amplify Your Impact

Directly support coastal cleanups and mangrove reforestation.

000

Secure Long-Term Value

Partner with a mission-driven enterprise offering recurring service revenue from ESG contracts.

Transparent & Accountability-Driven All operations tracked on-chain, ensuring complete transparency.

Improve your Score

ESG reporting made seamless for your portfolio and stakeholders.
